

## DAVID IMHOTEP Ph.D.

In 2008 David Imhotep, Ph.D. received the world's first Ph.D. in Ancient African History from Union University in Cincinnati, Ohio. He has served as President of the Egyptology Society of Miami at the Miami Museum of Science and Planetarium and he was the founder of the Association for the Study of Classical African Civilizations (ASCAC), Miami Chapter, established in 1991.

One of Dr. Imhotep's primary reasons for wanting a Ph.D. in Ancient African history was to secure the credentials needed to fight white supremacy in academia. Dr. Imhotep's first attack on white supremacy in academia began with editorial rebuttals to Eurocentric articles that appeared in *Atlantis Rising Magazine*, as well as a response to *National Geographic's*, "The Black Pharaohs" in the February 2008 issue correcting them on the African Ancestry of all Pharaohs until the Greek Ptolemies. His latest completed work is an article on the "African Aqualithic" just accepted by the *Journal of Black Studies*.

Widely respected as an outstanding researcher and Afrotologist, Dr. Imhotep has been researching and collecting information on Black history since 1970. His doctoral dissertation, "Nile Valley Civilizations Predated that of Mesopotamia" (a 450-page book available from Dr. Imhotep) provided the impetus for his book, *The First Americans Were Africans: Documented Evidence*.

## THE FIRST AMERICANS WERE AFRICANS DOCUMENTED EVIDENCE

by **David Imhotep, Ph.D.**

In his book, *The First Americans Were Africans, Documented Evidence*, Dr. Imhotep outlines the lost and stolen history of African peoples in ancient America. Herein you will discover the long antiquity of African people in the New World and how they contributed to the rise of civilization in the West. Dr. Imhotep totally destroys the notion that Clovis culture represents the first American civilization.

Dr. Imhotep does not begin his story of the African in America with the slave trade, instead, he provides details about the first civilizations in the New World which were created by Black and African people.

The archaeological, linguistic and genetic evidence makes it clear that Dr. Imhotep's discussion of Blacks in America long before Columbus is truth. It shows that Dr. Imhotep is opening a new path of scholarship relating to the peopling of the New World that is long overdue.

"We are all of one family, the Human family, that comes in many colors of the rainbow. There is the possibility, that if true history could be taught in schools, things would change for the better and the "so-called" racial divisiveness all around the world would improve. We are family."

David Imhotep, Ph.D.

## THE FIRST AMERICANS WERE AFRICANS

DOCUMENTED EVIDENCE

by **David Imhotep, Ph.D.**

## Here is the evidence...

✓ The evidence for ancient African migrations comes in multiple forms: skulls and skeletons; footprints in lava; campsites; genetic M174 and D haploid groups; linguistics; paintings; tools; carvings; architecture; Egyptian writing, artifacts and structures.

✓ The photo on the left depicts the last meeting of the Algonquin Council, which took place in the 1920s in Providence, RI. No one in the picture nor any of their ancestors

were slaves; these were Black Indians! At one time they lived on a reservation in the area.

✓ A 600-yard long breakwater and pier has been discovered one mile off Bimini Island in the Bahamas. It is at least six to seven thousand years old. Evidence suggests it was probably built by the Nile Valley people. Bimini structures, including Egyptian columns and obelisks, that were built before or at the end of the Ice Age have also been found two miles west of Bimini Island in ninety feet of water.

✓ Cyrus Thomas, Director of the Eastern Mound Division of the Smithsonian Institute's Bureau of Ethnology in the 1880s, noted that, "There was a race of mound builders in America distinct from the American Indians." These "mound builders" were short Africans who constructed subterranean mound homes in the Americas. Some were built with large stone corbel-vaulted ceilings – identical to the one in the "Grand Gallery" of the Great Pyramid of Giza.

# THE FIRST AMERICANS WERE AFRICANS

## DOCUMENTED EVIDENCE

### Here are the facts...

✓ **Columbus did *not* discover America. In fact, Africans have been traveling to the Americas for at least 60,000 years.**

✓ **Although the Ice Age was a barrier to man's overland migration to the New World, Black Africans had been here even before the ice melted.**

✓ **Along with their reed boats, Black Africans brought their technology with them to the Americas.**

✓ **Africans created sophisticated cultures throughout the North and South American continents.**

**Dr. Imhotep's book is available for purchase at:**

**[www.HistoricTruth.info](http://www.HistoricTruth.info)**

In his clear, persuasive book, *The First Americans Were Africans, Documented Evidence*, Dr. David Imhotep outlines the lost and stolen history of African people in ancient America. Here you will discover the antiquity of African people in the New World and how they contributed to the rise of civilization in the Western Hemisphere.

### More evidence...

✓ Thor Heyerdahl launched The Ra expedition in 1970 constructing a reed boat copied from an ancient Egyptian design. He sailed it from Africa to the Barbados to prove it could have been done in ancient times as well.

✓ The Aymara Indians, who live around Lake Titicaca in South America, continue to make reed boats today (see photo insert above) the same way the Africans did thousands of years ago – powerful evidence of their trans-Atlantic voyages in ancient times.
